

Decorative Concrete Supply, Inc. presents and welcomes Tamryn with Surface Gel Tek and Rick White for Vertical Mix:

Day 1 Surface Gel Tek / Flattoo

Gels for Profiling Floors and a Stencil System that works for you!

Day 2 Vertical Stamping

Day 1

Tamryn's Bio:

President/CEO of Surface Gel Tek since 2000 and is the inventor of Stain Mule and the Flattoo System. Tamryn is the company's graphics contact and has worked globally with contractors from the design phase through the installation phase. Her "hands on" training technique assures contractors leave with knowledge that will increase their earning potential.

Workshop description for Surface Gel Tek/Flattoo:

Flattooing - tattooing images into flat concrete surfaces - is a Surface Gel Tek's (SGT) exclusive graphic system. The system includes vinyl adhesive templates called Flattoos, SGT's gelled acids and Stain Mule, a color thickener.

When SGT designed this system, their focus was "MAKE IT EASY TO USE AND MAKE THE GRAPHICS UNLIMITED".

SGT's Flattoo motto is "Precision Graphics On Demand - Delivered When You Need Them".

Flattoo Workshop will include:

1. Understanding how SGT's gelled acids work with the concrete and Flattoos.
2. Using acid stains as a base color
3. Application of simple to complex Flattoos - focus on corporate logos and decorative images
4. Etching images into concrete surfaces using gelled acids with the Flattoos
5. Working with Stain Mule - color thickener - for precision placement of multiple colors
6. Using sealers as a mask out

Surface Gel Tek's (SGT) gelled acid products are not your Grandfather's liquid acid. Their formulation makes hydrochloric acid safer for the environment and the end user. The gel formula reduces fuming and keeps the acid on the surface, unlike liquid acid that penetrates into the substrate causing additional problems such as spalling and soft spots.

The Federal Government has identified SGT's gelled acid products as "GREEN".

1. They generate no silica dust or noise pollution
2. They contain no VOCs
3. They neutralize with water
4. They are flushable to sewer

THAT'S AS GREEN AS IT GETS!!!

These products clean and profile in one step.

They offer unlimited graphics for corporate logos, trademarks, decorative borders, medallions, etc. They have no design, detail, size or language limitations.

Day 2

SS Vertical Stamping system is a revolutionary system that consists of a unique, lightweight Vertical Stamp Mix.

SS Vertical Mix bonds to most surfaces, is water resistant and unequalled in flexural and compressive strength.

It can be applied up to 3 in thick and stamped within minutes, so you can achieve the decorative look normally achieved on flatwork on—fences, interior or exterior walls, pillars—you name it!

**When: March 26th Surface Gel Tek/Flattoo
March 27th Vertical Stamping**

**Where: DCS 8329 Monticello Rd. Ste. E,
Shawnee, KS 66227**

Time: 8:30 am—4:00 pm

Cost: \$100 per person (lunch provided)

RSVP: (913) 422-4443 or

trina@murraydecorative.com or
